

Start Here - LED HALF MOON

1 Getting Started

1. Carefully remove packaging.
2. To clean the tank, use clean water and paper towels. Do not use chemicals not intended for aquarium use.
3. Add three AA batteries (not included) to the battery compartment in the LED light, or purchase a Micro USB B cable to use as an alternative power source (visit our online catalog for details). If the light doesn't start, make sure that the batteries are good. Do not mix new and used batteries.
4. Place the aquarium on a flat surface away from direct sunlight and air vents.
5. After rinsing your gravel and décor thoroughly, decorate your aquarium before adding water to avoid over-filling.
6. Fill the tank with room-temperature tap water and add 8 drops of Tetra BettaSafe or one Tetra BettaSafe tablet to remove chlorine.
